

HOW TO USE

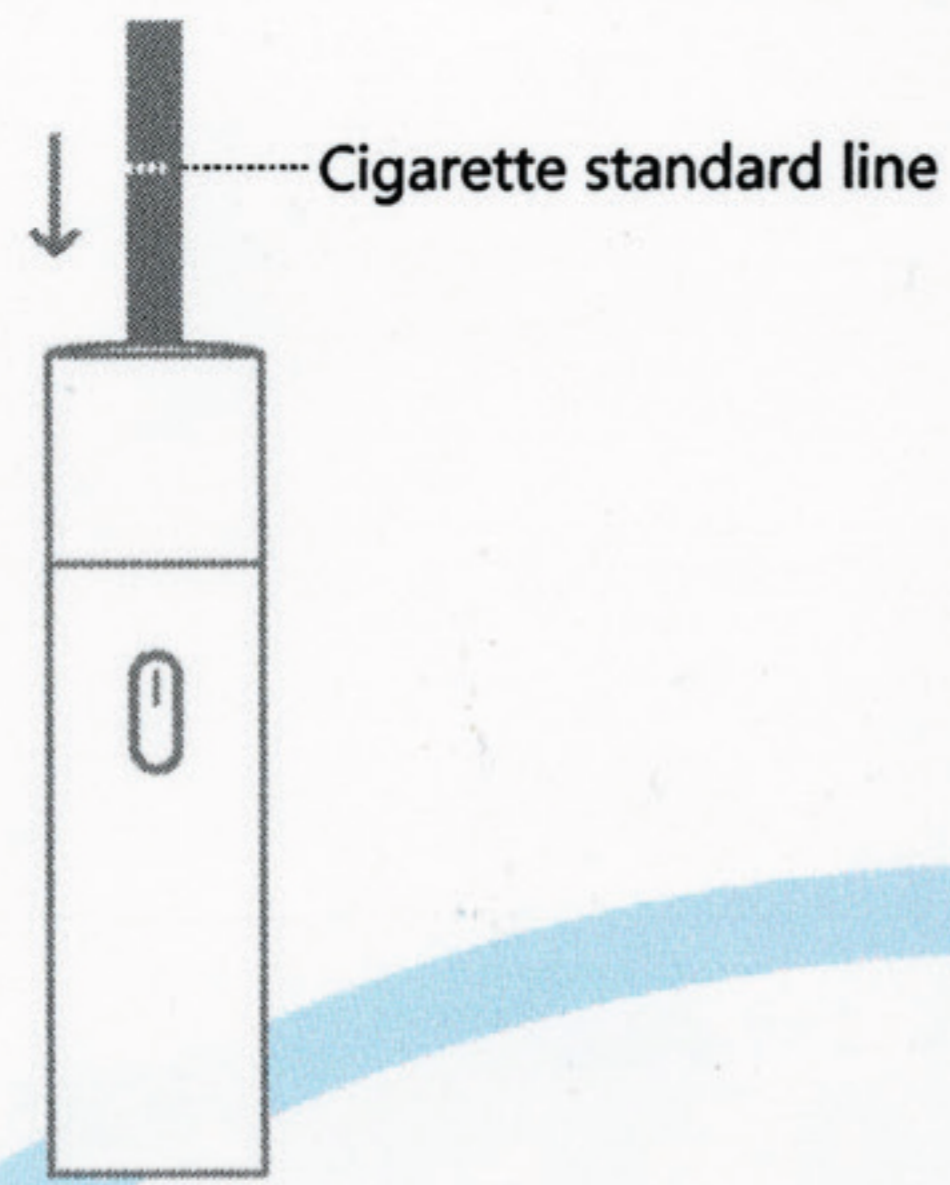

1
 Open the side

Push the slider in the direction of the arrow until the cigarette chamber is fully exposed.

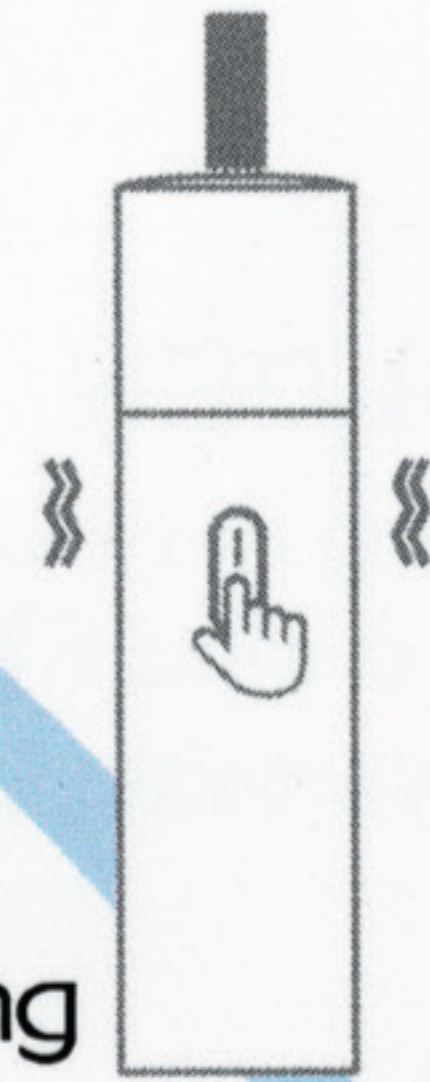

2
 Insert the HOO cigarette

Insert the HOO cigarette up to the horizontal line on the cigarette.

3
 Start heating

Press and hold the button for 2 seconds, then the device vibrates and the LED flashes.

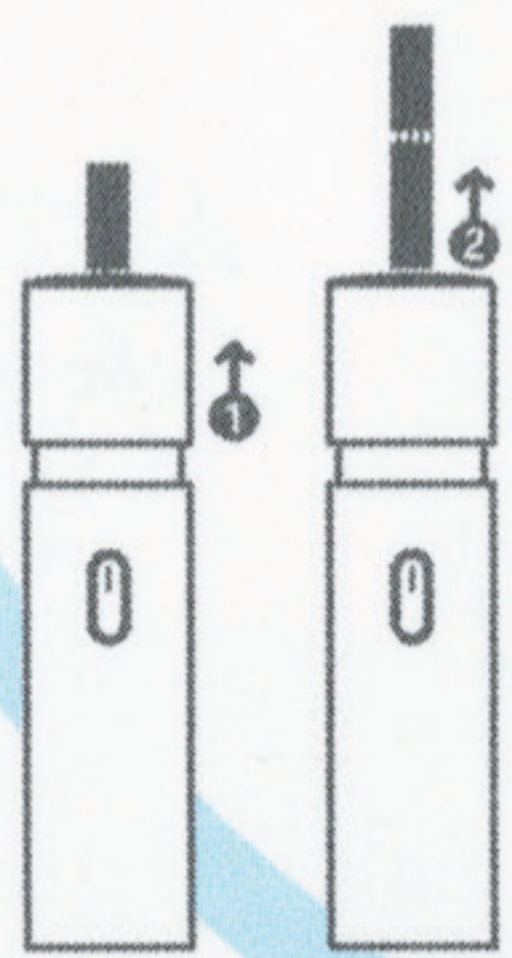

4
 Start smoking

When the LED is normally on and the device vibrates, the heating is completed and you can start smoking.

6
 Remove the HOO cigarette

Rotate the cigarette 3 times, and pull out upwards to remove it.

5
 Smoking to be finished

The smoking cycle of one cigarette is 4 minutes and 15 seconds. When the remaining smoking time is 10 seconds, the device vibrates once and the LED flashes, indicating that the smoking is to be finished and the device will turn off automatically in 10 seconds. In the process of heating and smoking, if you need to manually turn off the device, press and hold the button until the LED goes out.

Heat not burn cigarette device

Mode: F002H

Battery: Li-ion

Capacity: 1100mAh

Input: 5V/1A

Registration serial number:MSIP-REM-Dre-RH-050210YKO
